

## Special Issue

# New Developments in Pharmacological Drug Discovery for Cardio- and Neuroprotection against Ischemia/Reperfusion Injury

### Message from the Guest Editors

Cardiovascular disease is a significant health burden which is steadily rising. Ischemia/reperfusion injury to vital organs such as the heart and brain, encountered during myocardial infarction, stroke, and/or cardiac arrest, often results in death or permanent disability. Although ischemia already causes enormous detriment, the reintroduction of blood flow during reperfusion is thought to contribute even more to the overall injury. Thus, novel strategies to reduce vital organ injury during ischemia and upon reperfusion are desperately needed. This Special Issue of *Cells* is designed to highlight new developments in pharmacological drug discovery to specifically aid in neuro- and cardioprotection. We welcome high-quality basic science and translational studies that contribute to progress in this important field.

### Guest Editors

Prof. Dr. Matthias L. Riess

1. Anesthesiology, TVHS VA Medical Center, 1310 24th Avenue South, Nashville, TN 37212, USA
2. Departments of Anesthesiology and Pharmacology, Vanderbilt University Medical Center, 1161 21st Avenue South, Nashville, TN 37232, USA

Dr. Detlef Obal

MD, PhD, DESA, University Medical Line, Department of Anesthesiology, Perioperative, and Pain Medicine Cardiovascular Institute, Stanford University, Stanford, CA, USA

### Deadline for manuscript submissions

closed (30 September 2023)

## About the Journal

### Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

---

### Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,  
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,  
Copenhagen, Denmark

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
