Novel Insight into Cell Cycle and Proliferation: Impact on Pathophysiology and Translational Medicine

Message from the Guest Editor

The proposed Issue is focused on novel pathways involved in the regulation of the cell cycle and proliferation in animal cells. Emerging factors regulating cell proliferation are of interest at this time. The gene encoding for growth factors and cytosolic and membrane proteins may affect the cell cycle inhibiting proliferation or inducing proliferation. Ion channel subunits and transporters, for instance, are some of the latest factors that were demonstrated to be capable of regulating the cell cycle and proliferation. The novel role of kinases and enzymes of the inflammatory cascades that can be targeted regulating cell proliferation is also of interest. The collected “in vitro” data should have translational significance when validated in animal models of diseases, especially cancers and inflammatory based-diseases, or in robust “in vitro” models of diseases. The signaling pathway hypothesis and the mechanism regulating proliferation in normal and disease conditions need to be discovered. We do not include papers related to the epidemiology of disease at this time.

Guest Editor

Prof. Dr. Domenico Tricarico
Section of Pharmacology, Department of Pharmacy-Pharmaceutical Sciences, University of Bari, Via Orabona 4, 70125 Bari, Italy

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Neuroscience, UMN Twin Cities, 6-145 Jackson Hall, 321 Church St SE,
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,
Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
