

Topical Collection

The Pathogenesis of Neurological Disorders

Message from the Collection Editor

This Topical Collection shall highlight the global research efforts aimed at exploring causes, identifying disease biomarkers, and strategies/therapies that can attenuate disease symptoms and reduce the social and economic impact of neurological disorders. For this Topical Collection, we invite articles from researchers addressing their findings on novel mechanisms involving neuroinflammation, oxidative stress, gut-brain interaction, and lncRNAs in neurological disorders. Additionally, we hope to attract studies aimed at discovering disease biomarkers for early diagnosis and novel therapeutic approaches or strategies to prevent or stop the progression of neurological disorders.

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,
Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
