

Special Issue

Luminescent Glass-Ceramics: Fabrication, Characterization, Application

Message from the Guest Editors

The purpose of this Special Issue is to showcase established findings, cutting-edge discoveries, emerging perspectives, and practical applications of glass-ceramics in the fields of optics and photonics. A key objective is to offer a technological outlook on the development of photonic glass-ceramics, highlighting their wide-ranging functional potential. This initiative aims not only to share insights from leading experts but also to provide a platform for researchers exploring unconventional and forward-thinking approaches to advancing photonic glass-ceramic technologies. In this context, we expect that the Special Issue will feature significant technological progress and the latest innovations in processing techniques and novel applications. We warmly welcome contributions from dedicated professionals across academia, research institutions, industry, and start-ups who are engaged in pushing the boundaries of photonic glass-ceramics.

Guest Editors

Dr. Dragana Marinković
Dr. Salvador Carmona-Téllez
Dr. Maurizio Ferrari

About the Journal

Message from the Editor-in-Chief

Ceramics (ISSN 2571-6131), an international, open access journal, provides an advanced forum for ceramics science and engineering. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We are committed to drive *Ceramics* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts. Your contribution should lead to the development of technical ceramics with better performances and to improve our quality of life.

Editor-in-Chief

Prof. Dr. Gilbert Fantozzi
INSA-Lyon, MATEIS Laboratory UMR CNRS 5510, 69621 Villeurbanne,
France

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), and other databases.

Journal Rank:

JCR - Q2 (Materials Science, Ceramics) / CiteScore - Q2
(Materials Science (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
