

Special Issue

High-Temperature Ceramics

Message from the Guest Editors

The world of ceramics is rich in diversity and unexpected new properties. This is particularly clear regarding mechanical properties if we consider, though not exclusively, the new carbides, nitrides, and borides which are available today. Astonishing optical, electrical or magnetic properties can also be measured in ceramics operating at high temperatures. This issue is devoted to any contribution reporting original research on physical properties of advanced ceramics at high temperatures. Experimental and theoretical contributions are very welcome, particularly those connecting both experimental analysis and a theoretical explanation of them. Papers describing new experimental techniques are also considered.

Guest Editors

Prof. Dr. Diego Gomez-Garcia

Condensed Matter Physics, Universidad de Sevilla, 41012 Sevilla, Spain

Dr. Bibi Malmal Moshtaghioun

Institute of Materials Science of Aragon, ICMA, Universidad de Zaragoza, Zaragoza, Spain

About the Journal

Message from the Editor-in-Chief

Ceramics (ISSN 2571-6131), an international, open access journal, provides an advanced forum for ceramics science and engineering. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We are committed to drive *Ceramics* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts. Your contribution should lead to the development of technical ceramics with better performances and to improve our quality of life.

Editor-in-Chief

Prof. Dr. Gilbert Fantozzi

INSA-Lyon, MATEIS Laboratory UMR CNRS 5510, 69621 Villeurbanne,
France

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), and other databases.

Journal Rank:

JCR - Q2 (Materials Science, Ceramics) / CiteScore - Q2
(Materials Science (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 3.7 days (median values for papers published in this journal in the first half of 2025).
