Composite Nanopowders: Synthesis and Applications

Message from the Guest Editor

The Special Issue "Composite Nanopowders: Synthesis and Applications" will involve regular research articles, reviews and short communications devoted to the development of synthetic approaches to obtaining various nanosized/submicron ceramic materials with the target performances (particularly including specific properties adjustable by the variation of the synthesis conditions), their characterization, modeling/simulation and applications. **Keywords**

- ceramics
- nanoparticles
- surface and interface properties
- carriers
- composites
- "core-shell" structure
- catalysis and photocatalysis
- targeted drug delivery

About the Journal

Message from the Editor-in-Chief

Ceramics (ISSN 2571-6131), an international, open access journal, provides an advanced forum for ceramics science and engineering. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We are committed to drive *Ceramics* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts. Your contribution should lead to the development of technical ceramics with better performances and to improve our quality of life.

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), and other databases.

Journal Rank:

JCR - Q2 (Materials Science, Ceramics) / CiteScore - Q2
(Materials Science (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 3.7 days (median values for papers published in this journal in the first half of 2025).
