

Special Issue

Challenges in Work and Employment during the COVID-19 Pandemic

Message from the Guest Editors

Dear colleagues, This Special Issue aims to contribute to a comprehensive understanding of the changes in the domains of work and employment as a basis for further research and new practices, which will potentially be relevant also in the long run after the acute crisis. Original research articles, communications, comprehensive reviews and any other types of submissions relating to the theme of the Special Issue, are welcomed. The topics of the researches may cover but are not limited to the impact of COVID-19 prevention measures on:

- Job security and employment status;
- Working hours at the workplace and working from home (teleworking);
- Quality of working life, including national- and workplace-level employment relations, workplace culture, leadership, management and supervision styles, trust and control, gender-based work practices, etc.;
- Reconciliation of work and family;
- Professional work practices traditionally characterized by close contacts with clients or students (social work, teaching and education, learning of vocational skills);
- Workplace development and workplace learning.

About the Journal

Message from the Editor-in-Chief

Planetary health provides an overarching vision of the interdependence of all life on Earth, offering a cohesive framework that connects scientific, social, and cultural understanding to guide our responses to the complex challenges of our time. *Challenges—Journal of Planetary Health* is dedicated to exploring these interconnections through transdisciplinary efforts spanning technological innovation, education, policy, and governance, as well as the human attitudes, values, and spirituality that shape social and ecological well-being and justice. We welcome a wide range of contributions from diverse fields, from the biological, physical, and technical sciences to the social sciences, arts, and humanities, that illuminate pathways toward the mutual flourishing of people, places, and the planet.

Editor-in-Chief

Prof. Dr. Susan Prescott
