Special Issue

The Bitcoin Challenge: Building the Evidence Base to Support Credible Environmental, Economic and Social Decision Making

Message from the Guest Editor

In this Special Issue, we welcome contributions from researchers on both sides of the Bitcoin debate, from researchers of diverse disciplines, and from nonacademic professionals. The focus of submissions should be on the creation, articulation, and/or communication of credible evidence about Bitcoin's technical, economic, social, governance, and environmental impacts and implications. Contributions may include scientific research and reviews, opinions on regional context-specific research needs, and practical contributions such as Bitcoin-focused case studies or policy analyses

(see https://www.mdpi.com/about/article_types for acceptable submission categories). We hope that this Special Issue will help refine the emerging Bitcoin research agenda, identify ways to best support informed decision making, and catalyze enduring improvements in human well-being.

Guest Editor Dr. Murray A. Rudd Science Advisor, Satoshi Action Education, Oxford, MS 38655, USA

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Addressing scientific advancements and technological processes responding to societal needs are the new frontiers that humankind needs to face and cope with. Discovery and advances in basic research, synthetic biology, biochemistry, material science and biosystems engineering, are providing cutting edge progress and solutions. Scientists from multidiscipline fields are invited to discuss challenging science and research, and technology innovations in *Challenges* aimed towards solving current problematic issues.

Editor-in-Chief

Prof. Dr. Susan Prescott 1. School of Medicine, University of Western Australia, Nedlands, WA 6009, Australia 2. ORIGINS Project, Telethon Kids Institute at Perth Children's Hospital, Nedlands, WA 6009, Australia 3. NOVA Institute for Health of People, Places and Planet, 1407 Fleet Street, Baltimore, MD 21231, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within RePEc, Gale, EBSCO, ProQuest, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 29.3 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the first half of 2025).
