

Special Issue

Complex Emulsions: Advances and Applications in Food Systems

Message from the Guest Editors

The efficient design and application of emulsion systems is a well-known approach in a range of disciplines, including food science. The ability of these systems to act as carriers of a variety of compounds and in turn enhance bioavailability, offer controlled substance release, and contribute to healthier formulations (reduced fat, salt, etc.) is well-documented, and has led to an increase in current research towards more complex emulsion systems. This Special Issue invites original research articles and review contributions on all aspects of emulsions in food, including but not limited to the formulation, evaluation, and applications of oleogels, double (or multiple) emulsions, Pickering emulsions, Janus emulsions, and other novel complex emulsion systems.

Guest Editors

Prof. Dr. Costas Stathopoulos

ERA Chair in Food Technology, Faculty of Agrobiology, Food and Natural Resources, Czech University of Life Sciences Prague, Prague, Czech Republic

Dr. Iveta Klotjová

About the Journal

Message from the Editor-in-Chief

Chemistry is a broad science and in *Chemistry* we hope to showcase the excellence of this fundamental discipline. Open Access publishing allows scientists to publish their research in a way that reaches the widest possible audience. In *Chemistry* we aspire to build a genuinely transdisciplinary culture in which communication of results between scientists active in different areas and between scientists and the broader public highlights the benefits that chemistry can bring to society. We encourage papers on all aspects of chemistry ranging from astrochemistry to zoochemistry, with everything in between. We also very strongly welcome inter- and multidisciplinary papers which expand the subject beyond its present horizons. We also welcome themed issues collecting reviews and state-of-the-art papers in topical areas of chemical science.

Editor-in-Chief

Prof. Dr. Igor Alabugin
Department of Chemistry and Biochemistry, Florida State University,
Tallahassee, FL 32306, USA

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), CAPlus / SciFinder, and other databases.

Reliable service:

rigorous peer review and professional production.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the first half of 2025).
