Deadline for manuscript
submissions:

31 December 2024

Message from the Guest Editors

Dear Colleagues,

The unique optical and electrical characteristics of nanomaterials and dielectric films have enabled the progress of applications such as localized surface plasmon resonance (LSPR) and surface-enhanced Raman scattering (SERS). Furthermore, lithographic patterning of nanopatterned structures has resulted in high spatial resolution surface structures, while improving system sensitivity. In this Special Issue, we would like to compile the most recent theoretical and experimental research results related to this measurement principle, sensing formats, fabrication techniques, integration with artificial intelligence, optimization, and applications of surface plasmon sensors in industrial situations.

Therefore, we invite you to submit original research or review articles for this Special Issue, with emphasis on the most recent advances in SPR, or LSPR-based chemosensors, and their applications to the examination of chemical and biological samples.

Dr. Erick Reyes-Vera

Dr. Kaiwei Li

Message from the Editor-in-Chief

Chemosensors continues to grow as a forum for all manners of sensing that encompass chemistry. *Chemosensors* is published in open access format – all articles and content are released on the internet immediately following acceptance, thus allowing unlimited access to the content as soon as it is published. We would be happy to have you join our growing list of authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPlus / SciFinder](#), [Inspec](#), [Engineering Village](#) and [other databases](#).

Journal Rank: JCR - Q1 (Instruments and Instrumentation) / CiteScore - Q2 (*Analytical Chemistry*)
