

Green Analytical Methods for Environmental and Food Analysis

Guest Editor:

Dr. Jefferson Santos De Gois

Departamento de Química
Analítica (DQA), Rio de Janeiro
State University, Rio de Janeiro,
Brazil

Deadline for manuscript
submissions:

31 October 2024

Message from the Guest Editor

In the analytical chemistry field of research, eco-friendliness extends to green sample preparation methods, the reduction of solvents and reagent, the development of instruments and methods for direct solid sample analysis, the use of chemometric and computational modeling in order to simplify the procedure of analysis, among other applications.

This Special Issue aims to collect and present the recent achievements in green analytical chemistry, including all measurement techniques for all types of applications that reduce or eliminate the generation of chemical waste. Researchers are warmly invited to submit reviews and research papers for inclusion in this Special Issue.

an Open Access Journal by MDPI

Villeurbanne, France

Message from the Editor-in-Chief

Chemosensors is an international, scientific, open access journal on the science and technology of chemical sensors published by MDPI. All articles are released on the internet immediately following acceptance. The journal publishes reviews, regular research papers, and communications. The scope of Chemosensors includes:

New chemical sensors design

Electrochemical devices, potentiometric sensor, redox electrode

Optical chemical sensors

Analytical methods

Environmental monitoring

Gas detectors

electronic nose, etc.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPus / SciFinder](#), [Inspec](#), and [other databases](#).

Journal Rank: JCR - Q1 (*Instruments & Instrumentation*) / CiteScore - Q2 (*Analytical Chemistry*)
