### Message from the Guest Editors

This Special Issue aims to present recent developments in the processing methodology of any form of mesoporous functional nanomaterial, such as metal oxides, graphene, halide perovskites, and other novel 2D materials. Improvement of the gas-sensing performance of these materials, especially sensitivity, selectivity, as well as working conditions against specific chemical compounds, should be given special attention. The sensing process and mechanism involved and the use of these materials in real-world sensing platforms could be explored.

We invite researchers working on this area to submit their most recent research studies to this Special Issue. Full papers, communications, and reviews are all very welcome.

Deadline for manuscript  
submissions:

**15 February 2022**

## Editor-in-Chief

### Prof. Dr. Nicole Jaffrezic- Renault

Institute of Analytical Sciences,  
UMR CNRS 5280, Department  
LSA, 5 Rue de La Doua, 69100  
Villeurbanne, France

## Message from the Editor-in-Chief

*Chemosensors* is an international, scientific, open access journal on the science and technology of chemical sensors published by MDPI. All articles are released on the internet immediately following acceptance. The journal publishes reviews, regular research papers, and communications. The scope of *Chemosensors* includes:

New chemical sensors design

Electrochemical devices, potentiometric sensor, redox electrode

Optical chemical sensors

Analytical methods

Environmental monitoring

Gas detectors

electronic nose, etc.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPlus / SciFinder](#), [Inspec](#), and many [other databases](#).

**Journal Rank:** [JCR - Q2 \(Instruments & Instrumentation\)](#) / [CiteScore - Q2 \(Physical and Theoretical Chemistry\)](#)
