

Special Issue

Microfluidic Device Based Chemical and Biochemical Sensors

Message from the Guest Editors

Microfluidic devices coupled to sensors or immunosensors offer benefits such as small sample volumes, rapid turnaround times, and low cost. These devices consist of microchannels for transporting fluids, with part or all of the necessary components of an assay procedure being integrated into the device. Moreover, microfluidic technology is one of the most striking technologies that can be integrated with electrochemical or optical sensing systems to improve the overall performance of detection systems. This Special Issue of *Chemosensors* aims to collect the latest research in the field of microfluidic sensors applied to analyte determination in biological, pharmaceutical, agricultural, or environmental samples. Analytical work on all types of microfluidic sensors is welcome. Both original research papers and review articles will be considered for publication. **Keywords:** Electrochemical sensors; Microsensors-based nanomaterials; Optical sensors; Microfluidic devices

Guest Editors

Dr. Martín A. Fernández-Baldo

Dr. Matías D. Regiart

About the Journal

Message from the Editorial Board

Chemosensors continues to grow as a forum for all manners of sensing that encompass chemistry. *Chemosensors* is published in open access format – all articles and content are released on the internet immediately following acceptance, thus allowing unlimited access to the content as soon as it is published. We would be happy to have you join our growing list of authors.

Editors-in-Chief

Prof. Dr. Jin-Ming Lin

Department of Chemistry, Beijing Key Laboratory of Microanalytical Methods and Instrumentation, Tsinghua University, Beijing 100084, China

Prof. Dr. Nicole Jaffrezic-Renault

Institute of UTINAM, UMR-CNRS 6213, University of Franche-Comté, 16 Gray Road, 25030 Besançon, France

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Engineering Village and other databases.

Journal Rank:

JCR - Q1 (Instruments and Instrumentation) / CiteScore - Q2 (Analytical Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2024).
