# Rapid Point-of-Care Testing for SARS-CoV-2

### Message from the Guest Editors

It is my great honour to invite you to contribute to the Special Issue "Rapid Point-of-Care Testing for SARS-CoV-2". Since the first case was diagnosed in 2019, COVID-19 continues to be a challenge to the medical and scientific world and to engage us all in the continuous process of understanding the disease and specific approaches from early diagnostic and adequate treatment to prophylaxis. The role of researchers is to contribute to solutions that support diagnostic and prevention modalities at the POCT level. Therefore, we invite you to share your work to bring the SARS-CoV-2 infection control to the next step: active control.
