

Special Issue

Advances in Analytical Systems for Gaseous Mixture

Message from the Guest Editors

This special issue is dedicated to the recent novel and state-of-art approaches applied in the design of analysis systems for gaseous mixtures. The issue will explore new designs of gas sampling, gas fluidics and detection architectures developed to improve the performances of the device such as sensitivity, time-resolution, selectivity, portability, and its applications in different domains. The issue is focused on the following topics but not limited to it:

- On-line analysis system for gaseous mixture
- Gas analysis instrumentation
- Gas sensors (Optical sensors, metal oxide sensors, acoustic sensors, photoionization detectors, electrochemical sensors, ...)
- Gas chromatography
- Pre-concentration units
- Different sampling techniques
- Micro gas flow (Numerical and experimental research)
- MEMS-based systems
- Different data analysis approaches like deep learning for gases detection

Guest Editors

Dr. Stéphane Le Calvé

Institute of Chemistry and Processes for Energy, Environment and Health (ICPEES, UMR 7515), CNRS and University of Strasbourg, 25 rue Becquerel, 67087 Strasbourg, France

Dr. Sulaiman Khan

Max Planck Institute for the Science of Light & Max-Planck-Zentrum für Physik und Medizin, 91058 Erlangen, Germany

Deadline for manuscript submissions

closed (20 July 2022)

About the Journal

Message from the Editorial Board

Chemosensors continues to grow as a forum for all manners of sensing that encompass chemistry. *Chemosensors* is published in open access format – all articles and content are released on the internet immediately following acceptance, thus allowing unlimited access to the content as soon as it is published. We would be happy to have you join our growing list of authors.

Editors-in-Chief

Prof. Dr. Jin-Ming Lin

Beijing Key Laboratory of Microanalytical Methods and Instrumentation,
Department of Chemistry, Tsinghua University, Beijing 100084, China

Prof. Dr. Nicole Jaffrezic-Renault

Institute of UTINAM, University of Franche-Comté, UMR-CNRS 6213, 16
Gray Road, 25030 Besançon, France

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPIplus / SciFinder, Inspec, Engineering Village and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Physical and Theoretical Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
