

Special Issue

Electrochemical Impedance Spectroscopy (EIS): Biosensing Applications

Message from the Guest Editor

In this Special Issue of *Chemosensors*, we welcome submissions presenting the latest research activities in the field of electrochemical impedance spectroscopy for biosensing applications and presenting new and interesting studies related to the development of impedimetric biosensors, including experimental and theoretical aspects of interfacial processes on electrode surfaces.

- impedimetric biosensors
- impedimetric immunosensors
- impedimetric aptasensors
- impedimetric affinity-based biosensors
- electrochemical/impedimetric surface characterization
- kinetics of electrochemical/bioelectrochemical reactions

Please note that in addition to the above topics, any articles related to electrochemical sensors and electroanalysis are also acceptable.
