# **Special Issue**

# Recent Developments in Electrochemical Sensing

### Message from the Guest Editors

Daily life is becoming even more complex, and the quality control of environmental, food, cosmetic, biological and pharmaceutical samples requires simple, rapid and cost-effective determination methods. Electroanalytical techniques in connection with properly selected sensors constitute versatile tools in this respect, enabling on-site, on-line and inline measurements. Moreover, electrochemical sensing offers the possibility of investigating the interactions between different biological important species, e.g., drug-DNA, and/or understanding their action in living organisms, e.g., the antioxidant activity of natural polyphenolics. On the other hand, it is worth mentioning that the continuous and increasing development of various modified electrochemical (bio)sensors improves the performance characteristics and the applicability of electrochemical techniques. The aim of this Special Issue is to provide a comprehensive collection of papers revealing the current state of the research on electrochemical sensing and the latest findings in this area.

### **Guest Editors**

### Dr. Iulia Gabriela David

Department of Analytical Chemistry and Physical Chemistry, Faculty of Chemistry, University of Bucharest, 90-92 Panduri Avenue, Bucharest 5, 060274 Bucharest, Romania

### Dr. Dana Elena Popa

Department of Analytical Chemistry and Physical Chemistry, Faculty of Chemistry, University of Bucharest, 90-92 Panduri, 050663 Bucharest, Romania

### Deadline for manuscript submissions

closed (30 November 2023)

## Chemosensors

an Open Access Journal by MDPI

Impact Factor 3.7 CiteScore 7.3

### **About the Journal**

### Message from the Editorial Board

Chemosensors continues to grow as a forum for all manners of sensing that encompass chemistry.

Chemosensors is published in open access format – all articles and content are released on the internet immediately following acceptance, thus allowing unlimited access to the content as soon as it is published. We would be happy to have you join our growing list of authors.

### **Editors-in-Chief**

Prof. Dr. Jin-Ming Lin

Beijing Key Laboratory of Microanalytical Methods and Instrumentation, Department of Chemistry, Tsinghua University, Beijing 100084, China

Prof. Dr. Nicole Jaffrezic-Renault

Institute of UTINAM, University of Franche-Comté, UMR-CNRS 6213, 16 Gray Road, 25030 Besançon, France

### **Author Benefits**

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Engineering Village and other databases.

### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Physical and Theoretical Chemistry)

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
