Recent Advances in Electrode Materials for Electrochemical Sensing

Message from the Guest Editors

Recent years have witnessed the accelerated development of electrode materials with high levels of analytical performance, which extends their application in environmental, healthcare and food monitoring. Modified green and novel electrode materials, as well as platform design, have thus become a key area of focus regarding the enhancement and generation of low-cost, automated, and portable electrochemical sensing devices with high sensitivity and selectivity for real-time monitoring. Topics may include, but are not limited to, the following:

- Novel strategies for the production and application of nanosized materials in chemical sensors and biosensors;
- Development and exploitation of 2D and 3D materials for electrochemosensors;
- Chemical sensing and biosensing platforms in various applications, including healthcare, environmental monitoring and food quality control;
- Innovative and sustainable functional materials for the development of electroanalytical sensing platforms;
- Chemical sensing and biosensing with molecularly imprinted polymers, nanozymes and aptamers.

About the Journal

Message from the Editorial Board

Chemosensors continues to grow as a forum for all manners of sensing that encompass chemistry. *Chemosensors* is published in open access format – all articles and content are released on the internet immediately following acceptance, thus allowing unlimited access to the content as soon as it is published. We would be happy to have you join our growing list of authors.

Editors-in-Chief

Prof. Dr. Jin-Ming Lin

Beijing Key Laboratory of Microanalytical Methods and Instrumentation,
Department of Chemistry, Tsinghua University, Beijing 100084, China

Prof. Dr. Nicole Jaffrezic-Renault

Institute of UTINAM, University of Franche-Comté, UMR-CNRS 6213, 16
Gray Road, 25030 Besançon, France

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /
SciFinder, Inspec, Engineering Village and other
databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore -
Q1 (Physical and Theoretical Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 20.5 days after
submission; acceptance to publication is undertaken in 2.8
days (median values for papers published in this journal in
the first half of 2025).
