Special Issue

Frontiers in Fiber Optic Sensing

Message from the Guest Editors

In the last few decades, there has been growing interest in fiber-optic approaches to solve sensing problems, as this technology offers applied solutions to a wide range of sensing challenges. With recent advances in optical fiber technology, ultrafast lasers, sensor design/simulation tools, and optical interrogation systems, fiber optic sensing technology is expected to dominate the sensing industry even further. To this end, the exploitation of optical fibers for sensing solutions is expected to continue in the years to come. We welcome both original and review articles covering a broad spectrum of fiber optic sensing technologies and applications. Areas of interest include, but are not limited to, the following:

- Novel fiber optic sensor design and/or fabrication
- New developments in optical fibers for sensing applications
- Fiber-optic chemical and biosensing
- Grating or interferometric fiber-optic sensing
- Optical fiber-based plasmonic sensors
- Label-based and label-free optical sensing
- Emergent sensing applications in environmental monitoring

About the Journal

Message from the Editorial Board

Chemosensors continues to grow as a forum for all manners of sensing that encompass chemistry. *Chemosensors* is published in open access format – all articles and content are released on the internet immediately following acceptance, thus allowing unlimited access to the content as soon as it is published. We would be happy to have you join our growing list of authors.

Editors-in-Chief

Prof. Dr. Jin-Ming Lin
Beijing Key Laboratory of Microanalytical Methods and Instrumentation, Department of Chemistry, Tsinghua University, Beijing 100084, China

Prof. Dr. Nicole Jaffrezic-Renault
Institute of UTINAM, University of Franche-Comté, UMR-CNRS 6213, 16 Gray Road, 25030 Besançon, France

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Engineering Village and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Physical and Theoretical Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
