# **Electrochemical Biosensors:** Advances and Prospects

## Message from the Guest Editor

This Special Issue will present comprehensive research outlining progress on the application of new materials or novel technology to improve the performance of electrochemical biosensors. Potential topics include electrochemical, electrochemiluminescent, and photoelectrochemical biosensors. We aim to attract both academic and industrial researchers in order to foster the current knowledge of electrochemistry and to present new ideas for biosensing applications. I cordially invite you to submit an article to this Special Issue. Both review articles and original research papers are welcome.
