

## Topical Collection

# State-of-the-Art in Chemical Sensors Modelling and Theoretical Statements

### Message from the Collection Editors

The dramatic growth in the interest toward chemical sensors based on aptamers, chemical aptasensors, requires one to take stock of the situation, recollecting ideas and information about the state-of-the-art and possible developments. To complement experiments with appropriate modelling is the most effective way to speed up progress. Aptamers allow massive calculations, such as those necessary in molecular dynamics and density functional theory, to envision their structure and to predict the docking with the target or to design the best strategy for functionalization on an appropriate substrate. Aptamer extreme flexibility makes both structure prediction and the envision of binding scenarios very challenging. A satisfactory and complete description of novel modified aptamers performances, the role of modifications in increasing affinity require a sort of theoretical investigation yet to come. For aptasensors, some standard issues concerning the interpretation of dose-response, linear and dynamical regime, impedance and amperometric data, diffusion, charge transport and so on deserve attention and consolidation. Feasibility and proof of concept studies are also welcome.

## About the Journal

### Message from the Editorial Board

*Chemosensors* continues to grow as a forum for all manners of sensing that encompass chemistry. *Chemosensors* is published in open access format – all articles and content are released on the internet immediately following acceptance, thus allowing unlimited access to the content as soon as it is published. We would be happy to have you join our growing list of authors.

---

### Editors-in-Chief

Prof. Dr. Jin-Ming Lin

Beijing Key Laboratory of Microanalytical Methods and Instrumentation,  
Department of Chemistry, Tsinghua University, Beijing 100084, China

Prof. Dr. Nicole Jaffrezic-Renault

Institute of UTINAM, University of Franche-Comté, UMR-CNRS 6213, 16  
Gray Road, 25030 Besançon, France

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /  
SciFinder, Inspec, Engineering Village and other  
databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore -  
Q1 (Physical and Theoretical Chemistry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 20.5 days after  
submission; acceptance to publication is undertaken in 2.8  
days (median values for papers published in this journal in  
the first half of 2025).
