Special Issue

State-of-the-Art in Electronic Nose Based on Optoelectronic/Electrochemical Sensors

Message from the Guest Editors

Nowadays, the analysis of volatile organic compounds (VOCs) is very important in various domains. In recent decades, electronic noses based on optical and electrochemical sensor array have emerged as promising alternatives to traditional analytical methods to detect the trace amount of analyte. The Special Issue of *Chemosensors* aims to collect both reviews and original research papers on the latest research activities in the field of electronic nose based on optoelectronic/electrochemical sensors, relevant to their applications. Potential topics include, but are not limited to, the following:

- Novel concepts of electronic nose based on optoelectronic/electrochemical sensors
- New operating principles for electronic nose based on optoelectronic/electrochemical sensors
- New sensor substrate and elements for optoelectronic/electrochemical sensors fabrication
- Digital imaging methods of colorimetric and fluorometric sensors
- Feature data selection and multivariate data analysis (volatile organic compounds, aqueous analytes, toxic chemicals, etc.)
- Applications of electronic nose based on optoelectronic/electrochemical sensors

About the Journal

Message from the Editorial Board

Chemosensors continues to grow as a forum for all manners of sensing that encompass chemistry. *Chemosensors* is published in open access format – all articles and content are released on the internet immediately following acceptance, thus allowing unlimited access to the content as soon as it is published. We would be happy to have you join our growing list of authors.

Editors-in-Chief

Prof. Dr. Jin-Ming Lin Beijing Key Laboratory of Microanalytical Methods and Instrumentation, Department of Chemistry, Tsinghua University, Beijing 100084, China

Prof. Dr. Nicole Jaffrezic-Renault Institute of UTINAM, University of Franche-Comté, UMR-CNRS 6213, 16 Gray Road, 25030 Besançon, France

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Engineering Village and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Physical and Theoretical Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
