Special Issue

State of the Art in Nucleic Acid Detection

Message from the Guest Editors

Nucleic acids (DNA and RNA) are considered biomarkers for many diseases, and tools of therapeutical intervention (antisense oligonucleotides, siRNAs, mRNA vaccines). Epigenetic DNA modification, epitranscriptomic RNA modification, single-nucleotide polymorphism, or specific DNA and RNA fragments detection give us a lot of information for the diagnosis of diseases, such as cancer and COVID-19 nucleic acid detection. The aim of this Issue of "State of the Art in Nucleic Acid Detection" is to highlight the recent development of nucleic acid detection of DNA and RNA modifications, mutations or specific nucleic acid biomarkers. Authors are invited to submit work exploring methods including mass spectrometry, chemical probes, nucleic acid sensors, DNA sequencing. electrochemical, optical, lab-on-a chip devices, clinic kits, molecular diagnostic methods, advanced and automated sensing platforms, bioassays, and detection systems for nucleic acid detection. Both review articles and research papers are welcome.

About the Journal

Message from the Editorial Board

Chemosensors continues to grow as a forum for all manners of sensing that encompass chemistry.

Chemosensors is published in open access format – all articles and content are released on the internet immediately following acceptance, thus allowing unlimited access to the content as soon as it is published. We would be happy to have you join our growing list of authors.

Editors-in-Chief

Prof. Dr. Jin-Ming Lin

Beijing Key Laboratory of Microanalytical Methods and Instrumentation, Department of Chemistry, Tsinghua University, Beijing 100084, China

Prof. Dr. Nicole Jaffrezic-Renault

Institute of UTINAM, University of Franche-Comté, UMR-CNRS 6213, 16 Gray Road, 25030 Besançon, France

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Engineering Village and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Physical and Theoretical Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
