Voltamperometric Sensors

Message from the Guest Editor

The aim of this Special Issue on “Voltamperometric Sensors” is to present the state-of-the-art on voltamperometric (bio)sensors, which allow the detection of one or more different chemical species from the complex solutions, and the recent advances in the field. For this purpose, the reviews covering the theoretical and practical aspects on the field of voltamperometric (bio)sensors are welcome. The papers devoted to the development, the characterization and the applications of voltamperometric (bio)sensors, individually and as multisensory systems, in the analysis of real samples are expected.

About the Journal

Message from the Editorial Board

Chemosensors continues to grow as a forum for all manners of sensing that encompass chemistry. *Chemosensors* is published in open access format – all articles and content are released on the internet immediately following acceptance, thus allowing unlimited access to the content as soon as it is published. We would be happy to have you join our growing list of authors.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /
SciFinder, Inspec, Engineering Village and other
databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore -
Q1 (Physical and Theoretical Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 20.5 days after
submission; acceptance to publication is undertaken in 2.8
days (median values for papers published in this journal in
the first half of 2025).
