

Special Issue

Recent Advances in Biosensors for Healthcare Applications

Message from the Guest Editors

Biosensors have traditionally played a major role in areas such as healthcare, drug discovery, food safety, environmental monitoring, homeland security and defence, among many others. More recently, with the growing interest in distributed sensing approaches—such as in point of care and telemedicine—biosensing platforms to generate information on-site in real time have become increasingly important. A centrepiece in the successful development of these tools is the compromise between the analytical figures of merit and some practical aspects regarding robustness, operational simplicity and cost. The aims of this Special Issue “Recent Advances in Biosensors for Healthcare Applications” are to highlight and share new approaches, solutions and applications of biosensors directed towards healthcare improvement. Studies including the validation of the suggested biosensor with real samples and against laboratory gold standards will have higher consideration for being accepted. Both review articles and research papers are welcome.

About the Journal

Message from the Editorial Board

Chemosensors continues to grow as a forum for all manners of sensing that encompass chemistry. *Chemosensors* is published in open access format – all articles and content are released on the internet immediately following acceptance, thus allowing unlimited access to the content as soon as it is published. We would be happy to have you join our growing list of authors.

Editors-in-Chief

Prof. Dr. Jin-Ming Lin

Beijing Key Laboratory of Microanalytical Methods and Instrumentation,
Department of Chemistry, Tsinghua University, Beijing 100084, China

Prof. Dr. Nicole Jaffrezic-Renault

Institute of UTINAM, University of Franche-Comté, UMR-CNRS 6213, 16
Gray Road, 25030 Besançon, France

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /
SciFinder, Inspec, Engineering Village and other
databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore -
Q1 (Physical and Theoretical Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 20.5 days after
submission; acceptance to publication is undertaken in 2.8
days (median values for papers published in this journal in
the first half of 2025).
