Message from the Guest Editors

Dear Colleagues,

Kawasaki disease (KD) is a systemic vasculitis that predominantly affects children under the age of 5 years, especially within the Asian population. Coronary artery lesions (CALs) are the most common and severe complications of KD. The response to intravenous immunoglobulin (IVIG) treatment is a crucial outcome that significantly influences the formation of CALs. Genetic expression holds promise in predicting KD and treatment outcomes.

We invite researchers to submit their work to this Special Issue on the genetic expression of KD. Exploring genetic factors is essential for enhancing our understanding of KD, particularly in predicting the disease and determining treatment efficacy. We look forward to receiving research contributions that shed light on the genetic expression of Kawasaki disease and its implications for prognosis and treatment outcomes.

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), and [other databases](#).

Journal Rank: JCR - Q2 (Pediatrics) / CiteScore - Q2 (Pediatrics, Perinatology and Child Health)
