### **Message from the Guest Editors**

Dear Colleagues,

Through this Special Issue, we would like to increase awareness regarding the long-term cardiovascular consequences of preterm birth.

Acceptable articles for this Special Issue include original research articles or reviews related to this topic. Neonatologists sharing their knowledge on the early prevention of kidney injury is also welcome. Avoiding hit after hit for the cardiovascular system and the kidneys would be an excellent prevention strategy that we look forward to highlighting.

Deadline for manuscript submissions:

**20 October 2024**
