Deadline for manuscript
submissions:

5 October 2024

Message from the Guest Editor

Dear Colleagues,

This Special Issue encompasses studies of the human gut microbiota and its impact on children's health and disease. Studies on the development of non-communicable diseases, central obesity/obesity, neurodevelopment, and gastrointestinal, immunological, inflammatory, and metabolic disorders; on the interaction of diet and the environment; novel studies using applied technologies; and on the biological-causal mechanism of the effect of the intestinal microbiota on health and disease in children will be considered for publication.
