### Message from the Guest Editor

Dear Colleagues,

This Special Issue of *Children* will focus on the health impact on children experiencing migration as refugees, immigrants, and those internally displaced within their own country due to war and conflict. Topics to be explored will include, but will not be limited to, the epidemiology of displacement, adverse health conditions, trauma and mental health, best practices and care coordination. We will also explore specific populations such as children with disabilities, unaccompanied minors and child separation at international borders. The Special Issue will conclude with an examination of new clinical guidelines, the development of new care systems and the advocacy for new policies addressing these children in need.
