Message from the Guest Editors

Worldwide, around 15 million children are born preterm (<37 weeks of gestation) and over 2 million are born very preterm (<32 weeks of gestation). Whilst survival for these infants has improved considerably, at least in wealthier countries, rates of longer-term health and term neurodevelopmental problems remain high and stable. The focus of this Special Issue is the short- and long-term neurodevelopmental and family impacts of very preterm birth, and in particular the identification of modifiable factors and innovative intervention approaches to improve outcomes for very-preterm-born children and their families. Epidemiological, clinical, and translational research concerned with the following are welcome. A limited number of systematic reviews or meta-analyses may also be considered. All papers will be peer-reviewed.

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), and [other databases](#).

Journal Rank: JCR - Q2 (Pediatrics) / CiteScore - Q2 (Pediatrics, Perinatology and Child Health)
