

Special Issue

Diagnosis and Management of Pediatric Ear and Vestibular Disorders

Message from the Guest Editors

We are pleased to announce a new Special Issue entitled “Diagnosis and Management of Pediatric Ear and Vestibular Disorders” in *Children*, an international peer-reviewed journal on children’s health, indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases. According to the World Health Organization (WHO), approximately 466 million people worldwide (or 6.1% of the global population) suffer from disabling hearing loss. Among these individuals, 34 million are children. Furthermore, the current lack of awareness and experience in the management of children with vestibular dysfunction often leads to a delay in diagnosis and an underestimation of the disease prevalence rate. In this context, it is crucial to provide new knowledge on the diagnosis, management, and treatment of pediatric ear and vestibular disorders. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
