# Impacts of Newborn Breast Milk Feeding

## Message from the Guest Editors

Dear colleagues, Human milk is the optimal form of nutrition for all infants, with significant short- and longterm benefits for both the mother and infant. Although there has been a modest increase in breastfeeding rates over the past few years, we remain short of our target goals, as described by the WHO and Healthy People 2020 goals. Breastfeeding rates have also not increased uniformly in all communities due to socioeconomic and cultural differences. This Special Issue is dedicated to studies regarding the impact of human milk and breastfeeding in achieving desirable health outcomes in our population of infants and their mothers. Research demonstrating the effects of human milk feeding on both short- and long-term mother-infant outcomes will contribute to the general knowledge base related to this topic and promote one of the major public health initiatives of our time.

## **About the Journal**

## Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

## Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA

## **Author Benefits**

## **Open Access**

 free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC. Embase, and other databases.

## **Journal Rank:**

JCR - Q2 (Pediatrics) / CiteScore - Q2 (Pediatrics, Perinatology and Child Health)
