Recent Advances in Pediatric Cardiac Surgery

Message from the Guest Editors

Congenital cardiac surgery has increasingly become a common approach for the treatment of complex congenital heart defects. At the same time, patients' age and weight at surgery has decreased, while adult patients have become more frequent in clinical practices, representing the most important patient group in personalized surgical therapy in the modern era. I strongly believe that it is time to provide an update on the results and outcomes of all new strategies in order to set a common future vision for the surgical treatment of this new population of patients. We invite you to share your clinical experience, surgical techniques, and multidisciplinary approach concepts in order to improve and optimize the overall outcome of congenital heart patients.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
