

## Special Issue

# State of the Art and Recent Advances in Pediatric Rheumatology

### Message from the Guest Editors

Dear colleagues, The study of childhood-onset rheumatic diseases involves several medical fields: general pediatrics, immunology, genetics, orthopedics, dermatology, gastroenterology, neurology, and adult rheumatology, to name some of them. Pediatric rheumatology is expanding thanks to the increasing knowledge on inflammation and immunological pathways. New therapeutic options for diseases such as juvenile idiopathic arthritis (JIA), juvenile systemic lupus erythematosus (SLE), and other connective tissue diseases are emerging. The recent discovery of inborn errors of the innate immune system defining new monogenic illnesses, the so-called autoinflammatory disorders, has widened the field of pediatric rheumatology further. Nowadays, this concept has been broadened to genetically complex conditions, such as systemic-onset juvenile idiopathic arthritis (SoJIA). Long-lasting treatments of childhood-onset rheumatologic conditions might result in several consequences, many of which still need to be clarified. The present Special Issue aims to explore the current knowledge on and advances in pediatric rheumatology.

---

### Guest Editors

Dr. Achille Marino

Pediatric Rheumatology Unit, ASST G. Pini & CTO, Milan, Italy

Dr. Cecilia Chighizola

1. Department of Clinical Sciences and Community Health, Research Center for Adult and Pediatric Rheumatic Diseases, University of Milan, Milan, Italy

2. Pediatric Rheumatology Unit, ASST G. Pini & CTO, Milan, Italy

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.
