Long COVID or Post-COVID-19 Syndrome in Children: What Do We Know So Far?

Message from the Guest Editors

Post-COVID and Long COVID are entities that are not well defined in Pediatrics and Adolescent Medicine. Altogether, prevalence as well as presentation seem to differ from what is found in adults. See

<https://pubmed.ncbi.nlm.nih.gov/35994282/> and

<https://pubmed.ncbi.nlm.nih.gov/36194229/> In recent

months, numerous publications have dealt with this issue, however terminology still remains heterogenous and study results are controversial. Prospective large-scale studies and meta-analyses are still missing, thus leaving space for individual opinions and speculations. A Special Issue of "Children" entitled **Post-COVID and Long COVID in children – what do we know so far?**

should shed more light on this issue. As guest editors, we invite you to submit your research work. Prospective controlled (large-scale) studies are preferred, but other contributions (e.g., case series) will be also considered according to their novelty.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
