New Insights in Neonatal Resuscitation—2nd Edition

Message from the Guest Editor

Around 10% of newborns require assistance to initiate breathing at birth, and approximately 1% need advanced resuscitative interventions to restore cardiorespiratory function. Effective neonatal resuscitation relies on a series of critical, time-sensitive actions that are essential in improving survival outcomes.

We welcome contributions addressing the following key areas: emerging techniques and technologies, clinical guidelines and protocols, quality improvement initiatives, multidisciplinary approaches, ethical considerations, global perspectives, long-term outcomes and follow-up, education and training innovations in preterm resuscitation, and challenges and future directions. We are committed to enhance the quality of care and outcomes for newborns in need of resuscitation.

We invite submissions of original research, including randomized controlled trials, observational and cohort studies, animal studies, review articles, systematic reviews and meta-analyses, trial protocols, and survey-based studies.

Guest Editor

Prof. Dr. Georg Schmölzer

Centre for the Studies of Asphyxia and Resuscitation, Neonatal Research Unit, Royal Alexandra Hospital, Edmonton, AB T5H 3V9, Canada

Deadline for manuscript submissions

30 January 2026

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
