

Special Issue

Oral Epidemiology and Pathology in Children

Message from the Guest Editors

With this Special Issue we intend to update information relevant to epidemiological studies and data on oral health carried out for children and young people in the globality of countries, regions, cities or minority groups. This information is of utmost importance for the realization, structuring, design and implementation of oral public health programs aimed especially at the child population. We also intend to carry out with this special issue the acquisition of information relevant to studies on primary prevention, health promotion and clinical trials of preventive actions for the different oral pathologies that can be presented in the child patient at the oral and dental level. We do not forget the different types of palliative and restorative treatments specific to children's patients that will be necessary for the implementation of these community oral health programs. I encourage you to participate in this Special Issue by sending the results of your research or reviews on the above mentioned topics.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA
