Special Issue

Advances in Child Neuropsychiatric Disorders

Message from the Guest Editor

Childhood neuropsychiatric disorders represent a rapidly evolving field at the intersection of neurology, psychiatry, and developmental sciences. Over the past decades, significant advancements in genetics. neuroimaging, and early intervention strategies have reshaped our understanding of these conditions. leading to more precise diagnostics and personalized treatments. This Special Issue will explore recent breakthroughs in the field, addressing biological underpinnings and innovative therapeutic approaches. We seek to highlight interdisciplinary research that bridges clinical practice and translational science, fostering a deeper comprehension of neurodevelopmental and psychiatric conditions in children and adolescents. We welcome the submission of original research, systematic reviews, and clinical studies on emerging biomarkers, novel interventions. and longitudinal outcomes. Research focusing on early diagnosis, digital health tools, and neurophysiological mechanisms are particularly encouraged. Through this collection, we hope to advance knowledge in this area and improve clinical care for young patients with neuropsychiatric disorders.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

 free for readers, with article processing charges (APC) paid by authors or their institutions.
