

## Special Issue

# Old and New Therapeutic Strategies in Children with Liver Disease

### Message from the Guest Editors

We are pleased to present this Special Issue of *Children*: 'Old and new therapeutic strategies in children with liver disease'. As of this issue, we look forward to collaborating with experts on topics of great importance to the pediatric community. Liver disease has always been a public health problem with few treatment options, particularly for cholestatic disorders. The topic has recently become very important due to advances in therapeutic strategies. New drugs have also been proposed that can change the outcome of some chronic liver diseases that sometimes require liver transplants. This Special Issue aims to provide an update on the old and new drugs for liver diseases and give an overview of the main currently available therapeutic strategies. Original articles and narrative or systematic reviews are welcome.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.
