New Research Progress on Endocrine Disorders in Infants, Children, and Adolescents

Message from the Guest Editors

It is with great pleasure that we invite you on behalf of *Children* to submit your research, reviews, clinical practice guidelines, case reports, and other article types in this Special Issue entitled “New Research Progress on Endocrine Disorders in Infants, Children, and Adolescents”. In the current Special Issue, we will focus on advancements made in the field of pediatric endocrinology, an exciting and constantly evolving field of study. In fact, we are confident that only through a constant collaboration among experts in this clinic area can progress be made in sectors such as disorders involving growth, pubertal development, sexual differentiation and development, thyroid and adrenal, pituitary tumors, calcium, phosphorus, vitamin D and bone metabolism, obesity, metabolic syndrome and others. Our aim is to disseminate new basic and clinical knowledge useful for both specialists and pediatricians and we would especially like to give space to new original cases and modern approaches in patient diagnostic, management or innovative therapies.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA
