

Special Issue

State-of-Art in Pediatric Otolaryngology-Head and Neck Surgery

Message from the Guest Editors

Care for children with otolaryngological disorders requires close collaboration between the otolaryngologist and the pediatrician. This Special Issue will provide up-to-date information on the most common diseases in pediatric ENT. This issue is dedicated to practicing pediatricians, general practitioners, otolaryngologists, medical students, and residents. It is important to understand otolaryngological diagnoses and treatment options, as well as common pediatric diseases that may impact medical care. Our goal is to present treatment algorithms and detailed analyses of the latest advances to enable the implementation of state-of-the-art methods in everyday practice. We promote the presentation of the latest research, comprehensive evaluations, and detailed case studies that expand our knowledge of pediatric ENT and offer practical suggestions for clinicians. Topics will include general otolaryngology, craniofacial surgery, hearing loss and pediatric otology, infection and inflammation, head and neck surgery, and evaluation and treatment of the pediatric airway.

Guest Editors

Dr. Monika Morawska-Kochman

Dr. Katarzyna Resler

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
Departments of Child Health and Neurology, University of Missouri, 400
