

Special Issue

The Influence of Parents and Family Factors on Children's Mental Health

Message from the Guest Editor

I am honoured to have been asked to serve as a guest editor for the new Special Issue of *Children* entitled "The Influence of Parents and Family Factors on Children's Mental Health." There is a growing awareness that the identification of and intervention in mental health problems in childhood and adolescents are effective and have a preventive effect. Investigating parental and familial perception of mental health needs in children is highly relevant, as they are the primary informants for children. The aim of this Special Issue is to produce a rich collection of research, articles, and opinions for clinicians, academics, and policy makers in the field of children's mental health. Contributions involving all aspects of this topic including the understanding, management, and improvement of mental health in children will be welcomed. Our work will be based on an interdisciplinary approach to disseminate advanced knowledge and evidence with the aim to provide the potential for a more comprehensive understanding of the relationship between parents, familial factors, and children's mental health. I look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
