

## Special Issue

# New Research in Pediatric Surgical Oncology

### Message from the Guest Editors

Pediatric surgical oncology represents a complex field of pediatric surgery, requiring mastery of all its technical aspects, including thoracic, urology, and abdominal surgery. New technology advances, including conventional minimally invasive surgery and robotic-assisted surgery, are still not standardized in terms of surgical indications and other innovations, such as three-dimensional imaging reconstruction and modeling, which are still in a pioneering phase. The relative lower volume of pediatric oncology patients when compared to the adult surgical oncology population makes it difficult to develop clinical research in pediatric surgical oncology. The aim of this issue is to highlight new insights into technical development controversial surgical indications and to enhance the relevance of clinical research in pediatric surgical oncology.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400  
Keene Street, Columbia, MO 65211, USA
