Behavioral and Mental Health Problems in Children

Message from the Guest Editor

COVID-19 pandemic has not only directly led to behavioral and mental health problems in children (BMPC) but also increased mental stress among youth, and poses a great challenge to child raising. This research goal is to provide a comprehensive understanding of the social and behavioral mechanisms leading to BMPC, and to develop behavioral and mental health promotion strategies and policy among children,, and to design and examine the effect of an intervention program about BMPC. We believe that the information obtained from this study could be helpful to inform health policy, plan prevention strategies, and design and implement appropriate, targeted interventions to help reduce behavioral and mental health problems in children.

We welcome submissions on the following subtopics: Explore social and behavioral mechanisms leading to BMPC. Examining to contextual influences on BMPC under the SSB model; Uncertainty stress studies;. Policy study; Identifying and controlling health-risk mental stress. Designing and examining the effect of intervention programs about BMPC.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
