

## Special Issue

# Injuries in Children with a Special Focus on Facial Injuries

### Message from the Guest Editors

As pediatric medicine and maxillofacial surgery advance at an unprecedented pace, understanding and treating facial injuries in children becomes increasingly pivotal. This Special Issue is dedicated to exploring the historical background and current state of knowledge of pediatric facial fractures, with an emphasis on their unique clinical aspects and treatment options. Our aim is to showcase the latest research and innovations in this field that could contribute to improved treatment outcomes for young patients. We invite submissions of original research, case studies, systematic reviews and meta-analyses that offer new insights into the diagnosis, treatment and long-term care of children with facial injuries.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.
