Diagnosis and Treatment of Pediatric Thyroid Disease

Message from the Guest Editor

Thyroid diseases are a common medical condition among the pediatric population. It is well known that thyroid hormones are essential for the normal development of children. Nowadays, we are increasingly diagnosing autoimmune thyroid diseases and thyroid cancers in children and adolescents. The main objective of this research topic is to present the latest research on the pathogenesis of thyroid diseases, new diagnostic methods, and the most innovative treatments. In this Special Issue, original research articles and reviews are welcome. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400
