

## Special Issue

# Psychological Health of Children and Adolescents in Times of Crises

### Message from the Guest Editor

We have just passed a worldwide state of emergency, i.e., the COVID-19 pandemic which caused more than 6 million deaths, as well as fear, worries and stress due to life-changing measures to contain the virus. The post-pandemic period, however, does not appear to be a relaxant one. Ecological crisis, armed conflicts and, especially, climate change are challenging for every one of us. How do these crises affect our children's mental health? What are the further consequences of external stress factors and what can be done to protect children and prevent potential burden and stress? With this Special Issue, we would like to provide an overview of the current worldwide situation of children's and adolescents' psychosocial wellbeing. We invite papers on the psychological health of children and adolescents, as well as the behavior problems related with psychosocial stress.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.
