# **Special Issue**

# Epidemiology and Injury Morphology of Childhood Traumatic Fractures

## Message from the Guest Editors

Pediatric traumatology is a constantly developing discipline, and absorbable implants are gaining more and more space in this field. The presentation of the experiences and the results of the method are essential for the new method to spread widely. In this Special Issue, we provide an opportunity to present the novelties in a high-quality scientific journal to specialists dealing with pediatric orthopedics and traumatology. Moreover, we are seeking the basic science of the studies of resorbable implants.

# **About the Journal**

## Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

### Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA

## **Author Benefits**

### **Open Access**

 free for readers, with article processing charges (APC) paid by authors or their institutions.
