Clinical and Basic Research on Chronic Rhinosinusitis in Children

Message from the Guest Editors

Rhinosinusitis is a common diagnosis that all of us have encountered. Chronic sinusitis is a significant problem for the pediatric population, despite being less common than acute sinusitis and receiving less attention than its adult counterpart. In recent years, there has been a growing interest in this clinical condition, and the goal of this Special Issue is to gather various clinical and research experiences on this subject. Therefore, submissions of articles focusing on the pathophysiology of chronic sinusitis and the role of the microbiome will be welcomed. Clinical works from pediatrics, otolaryngology, immunology of pneumology, etc. will also be appreciated, with a focus on both medical and surgical treatments, combined and multidisciplinary approaches, as well as the new frontier of biological therapy.

Guest Editors

Dr. Antonio Mario Bulfamante

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
Departments of Child Health and Neurology, University of Missouri, 400
