Advances in Pediatric Gastroenterology

Message from the Guest Editors

The field of pediatric gastroenterology is constantly evolving. Pediatric patients experience a wide range of gastrointestinal and liver diseases, from asymptomatic or mild issues to severe and potentially life-threatening conditions. In recent years, there have been significant advancements in basic science research, diagnostics, and treatment in pediatric gastroenterology. However, there are still many gaps in our knowledge concerning the pathogenesis, diagnostics, and management of these diseases. This Special Issue aims to gather and publish original research articles and reviews that highlight recent advances in these areas within pediatric gastroenterology. Given your expertise in this field, we are pleased to invite you to contribute to the upcoming Special Issue titled “Advances in Pediatric Gastroenterology”. We look forward to receiving your submissions.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
